List of available METIS documentation

This document lists the documentation available for METIS:

1. Artaud_2018_Nucl._Fusion_58_105001.pdf:
   Reference paper for METIS.

2. description_model_ICRH_Dumont-Vu.pdf
   This document describes in details the Dumont-Vu model for ICRH implemented in METIS.

3. Howto_METIS_final.pdf
   This is a “How to” introduction to METIS. Maybe the first document to be read before launching METIS graphical user interface.

4. Index_METIS_documentation.txt
   This document.

5. METIS_Core_edge_coupling_howto.pdf
   Information on the model describing the edge in METIS (2-point model + simple model for tungsten source and accumulation).

6. metis_documentation_for_input_data_structure.pdf (or metis_documentation_for_input_data_structure.rtf)
   This document describes the input data structures of METIS in MATLAB.

7. metis_documentation_for_output_data_structure.pdf (or metis_documentation_for_output_data_structure.rtf)
   This document describes the output data structures of METIS in MATLAB.

8. metis_documentation_for_parameters_expert_mode.pdf (or metis_documentation_for_parameters_expert_mode.rtf)
   This document lists and describes the complete set of internal parameters of METIS.

9. metis_documentation_for_parameters_standard_mode.pdf (or metis_documentation_for_parameters_standard_mode.rtf)
   This document lists and describes a subset of internal parameters of METIS. This is the subset accessible in standard mode of METIS graphical user interface mainly use during initial training.

10. METIS_HELP.pdf
    This is the initial technical METIS documentation.
    This document can still be useful but is not up-to-date.

11. metis_imas_output_documentation.md
    This document lists the data write in IMAS IDSs by METIS.

12. METIS_inputs_from_IMAS_IDSs.pdf (or METIS_inputs_from_IMAS_IDSs.rtf)
    This document describes the input of METIS at IMAS IDS format.

13. METIS installation guide CeCiLL C.pdf
